

Perceptron GmbH is the European headquarters of a leading supplier of non-contact, laser-based dimensional measurement systems that has been firmly established on the market for over 30 years. Our reliable, proven metrology solutions are employed primarily in the automotive industry. Our committed, international team comprises around 250 employees worldwide. To learn more about Perceptron, please visit our website: www.perceptron.com

For our European headquarters in Munich, Germany, we are looking for a competent and experienced

Project Engineer UK (m/f)

Job Profile:

- On-site integration of Perceptron measurement equipment in automotive manufacturing plants, from system installation to buy-off
- Full project management, including time reporting and documentation
- Ongoing field support of installations
- Support of customer maintenance team during on-site troubleshooting
- User training
- Extensive travelling to the various automotive plants in the U.K, but also on the European continent
- Located in the United Kingdom

Your skills and personal profile:

- Engineer or engineering technician - mechanical engineering, electrical engineering or automation engineering
- Knowledge and experience with:
 - Robot programming (common industrial robots)
 - Industrial communications systems and PLCs
- Job experience and/or internship in the automotive industry (manufacturer or first tier supplier)
- Language skills: English (native speaker or fully fluent); plus one additional language (e.g. German, French or Spanish)
- Driver's licence
- Self-reliant work-style, team spirit

Perceptron offers:

- Challenging and multi-facetted field of activities
- Highly motivated team working in an international business
- Attractive, performance-related salary and social benefits
- Task-focused advanced training

Are you interested in joining our team? To apply for this position, please send your curriculum vitae, earliest start date and salary expectations to: jobs@perceptron.de

We are looking forward to your application!
